Product description:

The SKY LIGHT 300×600mm (B2) is a recessed LED panel light designed to provide efficient and uniform illumination for indoor environments. Featuring adjustable color temperature, high luminous efficacy, and a compact panel design, it offers reliable lighting performance while supporting a wide range of application requirements.

Features:

| Feature                      | Description                                                       |
|------------------------------|-------------------------------------------------------------------|
| High Luminous Efficiency     | Delivers up to 140 lm/W for energy-efficient lighting             |
| Adjustable Color Temperature | Supports color temperatures from 2200K to 9000K                   |
| Uniform Illumination         | 45° beam angle provides focused and consistent light distribution |
| Good Color Rendering         | CRI 90 ensures natural color appearance                           |
| Recessed Installation        | Designed for easy integration into ceiling systems                |
| Energy-Efficient Operation   | Low power consumption of 36W                                      |
| Reliable Performance         | Backed by a 2-year warranty                                       |

Technical Specifications:

| Parameter                   | Specification      |
|-----------------------------|--------------------|
| Dimensions                  | 600 × 300 × 150 mm |
| Cut-Out Size                | 585 × 285 mm       |
| Power                       | 36W                |
| Color Temperature           | 2200K – 9000K      |
| Color Rendering Index (CRI) | 90                 |
| Beam Angle                  | 45°                |
| Luminous Efficacy           | 140 lm/W           |
| Warranty                    | 2 Years            |
