

# LINEAR WALL WASHER – 36W

Drawing CODE: WW

Product CODE: ISH-WW-36W

BRAND:ARCHLUX

## Product description:

The Linear Wall Washer – 36W is a premium floor recessed LED wall washer designed for powerful architectural illumination and outdoor landscape enhancement. Featuring a high-performance USA CREE LED chip with a 36W output, it delivers strong and consistent illumination with excellent efficiency and long-distance wall-washing performance.

The 3000K warm white light creates an elegant architectural atmosphere while the precision wall-washing optics provide smooth and uniform illumination for façades, boundary walls, and architectural structures up to 8 meters in height. Constructed with a durable aluminum housing and stainless steel frame, it provides excellent corrosion resistance and structural durability. Its fully sealed IP67 waterproof construction makes it suitable for demanding outdoor installations and all-weather environments.

## Technical Specifications:

| Parameter               | Specification                                                                   |
|-------------------------|---------------------------------------------------------------------------------|
| Product Type            | Floor Recessed LED Wall Washer                                                  |
| Power Consumption       | 36W                                                                             |
| LED Source              | USA CREE High-Performance Chip                                                  |
| Input Voltage           | AC 240V                                                                         |
| Color Temperature (CCT) | 3000K Warm White                                                                |
| CRI                     | 90                                                                              |
| Lighting Effect         | Wall Washer – Up to 8m Wall Height                                              |
| Material                | Aluminum Housing + Stainless Steel Frame                                        |
| Protection Rating       | IP67 Waterproof                                                                 |
| Installation Type       | Floor Recessed with Backbox                                                     |
| Dimensions              | 1000 × 90 × 75 mm                                                               |
| Power Supply            | Direct AC Operation – No External Driver Required                               |
| Sealing System          | Integrated Waterproof Structure with Filling Glue & Waterproof Plug             |
| Performance             | High Output, Uniform Wall Washing, Long-Distance Illumination                   |
| Application             | Building Façades, Boundary Walls, Landscape Architecture & Outdoor Wall Washing |
